Bioheat® is Clean.

It's a Match Made to Last!

Homeowners in Massachusetts love Bioheat® fuel because it is environmentally friendly and clean burning. Made from blends of renewable biodiesel and low-sulfur heating oil, it greatly reduces our state's carbon footprint.

- * A statewide pilot program testing Bioheat® fuel at universities, hospitals and other public facilities across Massachusetts demonstrated that using this fuel resulted in cleaner heating systems.
- * B5 Bioheat® fuel (5% biodiesel) reduces CO₂ emissions by 4 percent and sulfur emissions by 5 percent.
- * The City of Boston has included Bioheat® in upgrades to many decades-old parks and facilities as part of the Greenovate Boston initiative, which aims to reduce the city's greenhouse gas emissions by 25 percent by 2020 and by 80 percent by 2050.
