THE EVOLUTION OF OILHEAT

**Bioheat® is Domestic.**

# It's a Match Made to Last!

As one of the original 13 colonies, Massachusetts loves Bioheat® fuel because it's produced domestically from American fuels and feedstocks.

- \* In 2012, a coalition of 20 Massachusetts heating oil dealers gathered at Fenway Park to pledge to switch to Bioheat® fuel. Since then, countless others have joined the movement.
- \* Bioheat® fuel is made from domestically grown agricultural resources, which promotes America's independence from foreign oil sources.
- \* Production and distribution of Bioheat® fuel create thousands of jobs for Americans, which support the economy on a local and national level.
