

**Bioheat<sup>®</sup> is Clean.**

Today's Bioheat® produces near-zero emissions.

Thanks to advancements like ultra-low sulfur heating oil, home heating is now cleaner than ever. Plus, more and more homes are beginning to use Bioheat® fuel, which is even cleaner and better for the environment.

- **Today's Bioheat® Fuel burns cleaner**, reducing greenhouse gas emissions (GHG) of Sulfur, Nitrogen Oxides and Carbon Dioxide.
- **Bioheat® Fuel is kind to the environment.** In fact, residential Bioheat® Fuel-fired heating equipment is not even regulated by the Federal Clean Air Act.
- **Bioheat® Fuel storage is safe, reliable and convenient.** Today's tanks are designed with corrosion-resistant materials and can last for decades. New technology allows for remote monitoring to protect your home against the rare release, and ensures you always have a sufficient supply of fuel on hand.
