

Bioheat[®] is Efficient.

Bioheat® offers more warmth for less.

Today's heating systems are more efficient than ever before and can save homeowners up to 40 percent or more in fuel usage. Look for the EPA's ENERGY STAR® label when purchasing new heating equipment.

- **New heating systems now boast efficiency ratings of 95 percent.**
- **Recent studies funded by NYSEERDA show fuel savings as high as 48.3 percent** when replacing an outdated boiler with a new, high-efficiency boiler.
- **Heating equipment is constantly evolving to incorporate advancements in efficiency and comfort.** Many new boilers are designed to use weather-responsive controls that greatly reduce fuel usage during mildly cold weather and provide a more even heat with fewer temperature swings.
- **Installing programmable or wireless thermostats** to automate your home temperature settings may reduce your usage by as much as 10 percent.
